Evergreens

<u>Yew</u>		<u>Per 10</u>	<u>Per 100</u>	<u>Per 1000</u>
Japanese Spr.(Taxus Cuspidata)				
Rooted Cuttings.....	*		\$15.00	
4--8 inch T.....		\$ 3.00	25.00	
Japanese Upr.(Taxus Capitata)				
Rooted Cuttings.....	*		15.00	
4--8 inch T.....		3.50	30.00	
Hicks(Taxus Hicksi)				
Rooted Cuttings.....	*		15.00	
Hatfield(Taxus Media Hatfield)				
Rooted Cuttings.....	*		15.00	

Rooted Cuttings,very small transplants and seedling Evergreens should be shaded & watered for at least one year. One half shade is advised. Ground should be well worked & mellowed with Peat if very heavy. Larger Transplants can be field rowed but should be watered during dry Weather. All should be wellcultivated to keep down Weeds.Do not work the ground to late as this will tend to keep the trees from hardening up for Winter. A Mulch is very benificial. Commercial Fertilizers and fresh Barn Yard Manures should be used with care. They should not touch the roots.

Manny of our Customers have asked us which Trees are best for Christmass trees. The trees used in this State and the States of Minnesota and Upper Michigan are the Native Spruce Black and White also Norway, although Norway is not native to this locality it does very well here and is a very fast grower. Balsam Fir is the preferred tree due to its needle holding characteristics and fragrance. Manny localities use other Evergreens such as Austrian,Scotch and Norway Pines, Juniper and Firs in variety. Varieties in the greatest demand at the present timeare, first Balsam Fir,Norway Spruce,White Spruce and Douglass Fir. Black Spruce and Balsam Fir do very well in wet swampy places as well as on the high lands. We will be glad to furnish any information we can to those who want to start a Christmass tree plantation or Nursery.

C. Wilson's Nursery,
Pembine, Wisconsin.
